

Leaning Ladder & Pitched Roof Requalification Course

Who should attend?

Existing Tetra Leaning Ladder & Pitched Roof Instructors who previously attended Leaning & Roof Ladder Instructor Course whose certificate is due to expire within 3 months.

Course Aims

The purpose of this re-certification course is to provide all attendees with the opportunity to demonstrate sufficient knowledge, understanding and competence to enable Tetra to renew their instructor certificate.

Upon successful completion, Tetra will renew their certification for a further 3 years however where competence is not achieved instructors will be required to re-sit the entire 2 day program again.

Pre-requisites:

There will be a requirement for attendees to have their training manual and have delivered a course within the last 6 months.

In advance of the course they will need to prepare at least one classroom presentation and a practical task which will be allocated to them prior to attending the course.

Each attendee must bring their full Tetra Kit. All attendees must be medically fit to work at height.

Completion of a medical statement is mandatory.

Course information:

1-day duration, maximum 6 people.

Materials:

A new instructor guide and fob will be issued to each attendee in replacement for their old manuals.

Course content includes:

- Demonstrate the inspection standards for items of fall protection equipment.
- Conduct 1 classroom presentation.
- Demonstrate the correct fitting of the Tetra harness.
- Demonstrate the access processes for Leaning Ladder & Pitched Roof using the Tetra systems.
- Demonstrate sufficient underpinning knowledge of each system via the completion of a written assessment.
- Understand all equipment & material enhancements added to the course since your previous attendance.

Certification:

Certification & ID Card will be issued upon successful completion of the course and assessments. This will be valid for 3 years from date of course.

All training is designed and delivered to meet BS 8454:2006 code of practice for the delivery of training and education for work at height and rescue.
