

Ladder Users & Inspectors Course - LSR

Who should attend?

This course is designed for any individual who will use or supervise the use of leaning, steps and roof ladders in the workplace.

Course Aims

We aim to provide a complete introduction to this temporary access equipment covering both the theoretical and practical knowledge whilst outlining the dangers of incorrect ladder usage. We will explain how to select, set-up and use ladders as well as providing the required knowledge to carry out ladder inspections.

Pre-requisites:

No prerequisites are required although all attendees must be medically fit to attend – Completion of a medical statement sheet is mandatory.

Course information:

1-day duration, maximum 6 people.

Certification:

Certification and ID Card will be issued upon successful completion of the course and assessments. This will be valid for 5 years from date of course.

Course content includes:

- An outline of the HSE requirements for ladder usage including coverage of Schedule 6 – WAH Regulations.
- Address the requirements of the ladder hierarchy and the criteria for Short Duration Working.
- Address the key areas of risk assessment including coverage of risk organisation and competence planning.
- Outline the requirements for positioning, extending and climbing leaning, steps & roof ladders.
- Undertake classroom and practical exercises to confirm competence when using leaning, steps and roof ladders.
- Address the process for ladder inspection and the inspector's role to identify faults including coverage of the documentation for record keeping.
